# Unit 11. Symfony. Controllers, routes and views

Practice 01

# 1  UNIT 11 PRACTICE 01

**Creating a controller to say hello**

In your example01 application, create a controller named HelloController (if you haven't created it yet).

The controller must display a message in one of three languages: castellano, english or valencià.

## 1.1  Exercise 01

Create three methods, everyone associated to a different route.  Every method must display the welcome message in a language:

| Route | Message |
|---|---|
| 127.0.0.1:8000/hello/xxxxx | Welcome, Mr. or Mrs. xxxxx |
| 127.0.0.1:8000/hola/xxxxx | Bienvenido/Bienvenida, Sr/Sra xxxxx |
| 127.0.0.1:8000/holav/xxxxx | Benvingut o benvinguda, Sr/Sra xxxxx |

## 1.2  Exercise 02

In the same controller, create a method that display the welcome message in the language received as a parameter:

| Route | Message |
|---|---|
| 127.0.0.1:8000/welcome/en/xxxxx | Welcome, Mr. or Mrs. xxxxx |
| 127.0.0.1:8000/welcome/ca/xxxxx | Bienvenido/Bienvenida, Sr/Sra xxxxx |
| 127.0.0.1:8000/welcome/va/xxxxx | Benvingut o benvinguda, Sr/Sra xxxxx |
